

SCIENCE DAY

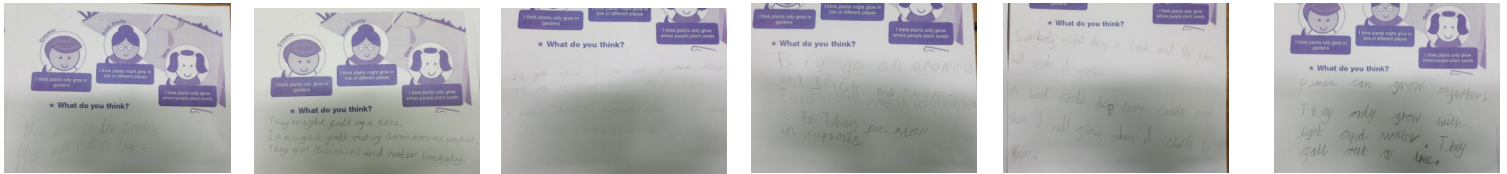

Tuesday 17th October 2017

Plant Detectives

Cosmic has found a plant growing out of the pavement. He can't work out how it got there. Plants grow in gardens, not pavements – don't they? Cosmic and Gem asked us to be plant detectives and look for

We made predictions using the knowledge we already have from our unit of work about plants.

Then we went outside to be plant detectives.

We found out that plants can grow in lots of different places like cracks in the playground, on walls and even on a carpet that is outside. They do not need to have soil to make them grow. We know that the plants have grown there because the seeds have been dispersed by the wind and animals.
