

### Communication and Language

We are working on the children expressing their ideas and feelings about their experiences using full sentences, including use of past, present and future tenses and making use of conjunctions, with modelling and support from their teacher. We would appreciate it if you could encourage your child to speak in sentences and not answer with one word.

### Physical Development

On Tuesday we will be having a PE coach in to work with the children. Mrs Pile will continue to work on their games and coordination skills on Thursday morning. Our fine motor control activities will be manipulating small 2d shapes into patterns and sequences. The children will continue to work on writing capital letters and using the correct grip on their pencils.

### Personal, Social and Emotion

We will be looking at the different factors that support their overall health and wellbeing: - regular physical activity - healthy eating - toothbrushing - sensible amounts of 'screen time' - having a good sleep routine - being a safe pedestrian. This week we are looking at why it is important to have a good night's sleep.

### Literacy

This week we will be writing our final piece of work inspired by Silly Doggy. The children have already planned a story based on the events in the story. They will be using this story map to write their own version. In phonics the children will be learning about the 'ure' sound. We will hear all the children read on Friday so please make sure you send their reading books in.

### **Hatchmere Planning**

**24.5.21**

### Understanding of the World

Hopefully if the weather is good to us we will be planting up the rest of our vegetables. The children will also continue to work on natural and manufactured objects. We will be going outside to collect different items and then sorting them into two piles. We will be looking at Africa and comparing it to our country.

### Parental Involvement Ideas

This week we going to be looking at 2d and 3d shapes. Try and find different shapes in your home and as you are out and about. Look for 3d shapes within everyday items. The circle in a cup, the rectangle within the TV, the triangle in the road sign etc. If you have time do a jigsaw with your child and talk about how to rotate and move the shapes so that they can fit.

### RE

This week in our class RE lessons we will be looking at the wonderful world that God gave us. The children will be using their senses to explore the world and talk about what they see, hear and feel. The children will be reflecting on who made this beautiful world.

**'A sweet friendship refreshes the soul'.**

**Proverbs 27:7**

### Mathematics

This week we will be looking at 2d and 3d shape. The children will be exploring how to compose and decompose shapes so that they recognise shapes can have other shapes within it, just as numbers can. Also, they will select, rotate and manipulate shapes in order to develop spatial reasoning skills.

The children will be working on number formation and sequence every day.
