

Communication and Language

Over the next two weeks the children will be collecting power words to help them with their final big write of the year. We will be asking questions about what next year has in store for us and talking about what we are looking forward to doing when we are big Year ones.

The children will be reflecting on what they have achieved in Hatchmere and celebrating their amazing progress.

Literacy

In Literacy this week we will be writing our Super hero poster for the Super Tato. The children will be using the words they have collected to describe the Super Tato's looks and characteristics.

In Phonics we are looking at compound words and focussing on the high frequency words their, our, Mr & Mrs.

Expressive Arts and Design

The children will be painting and drawing pictures of the bugs they find. We will also start learning our song for the Year 6 Leavers ceremony.

Parental Involvement Ideas

As it is our last plan of the year we would like you to talk to your child about what they have learnt during the year. Perhaps you could look at the very first blog and talk to the children about how they felt and how they feel now. Look at how far they have come and what amazing progress they have made.

Physical Development

On Tuesday afternoon we will be doing finishing off our PE lessons for the year by playing all the children's favourite games. The children will also be working on their athletic skills on Thursday with Ms Pile.

Hatchmere Planning

RE

In RE we are continuing our work on the Islamic faith. We will be looking at the Quran the Muslim Holy book and discuss the written language and how certain words are special to Muslims.

'A sweet friendship refreshes the soul.'

Proverbs 27:7

Personal, Social and Emotion

This week we will be looking at safety in our homes and on line. We will be talking to the children about their own personal responsibilities and what they should and should not do when on line...

Understanding of the World

This week we are going to explore the lifecycle of some of the insects we found on our walk. We will talk about the different habitats the bugs liked and try to work out why some like to live in cool dark places and some like airy light spaces. We will be looking at some of the amazing insects from around the world.

Mathematics

The children are going to continue their work on recognising and making shapes. We will be using our shape skills to sort shapes and to make patterns. We will be making shapes within shapes!

The children will be working on number formation and sequence every day.
