## Soundcheck

When pupils play Soundcheck, they are asked 25 questions, each with a 6-second time limit. The questions are multiplication only and evenly weighted in terms of difficulty each time they play - exactly the same as the UK government's 'Multiplication Tables Check'.

- Single player
- All tables up to 12×12
- 5 coins per correct answer
- 25 questions, 6-second time limit for each question

## Garage

The Garage is the best place for mastering individual tables as it's highly rewarding (10 coins per correct answer) and allows parents to decide what tables their children are asked.

The Garage is single player and children are able to decide whether to play in one, two or three minute games.

## Studio

The Studio is the place to go once you've mastered a few of the tables and you'd like to earn a Studio Speed and corresponding status. To do this, children must play ten games in the Studio mode.

Studio Speed is the average recall time from their most recent ten games. Once a player has completed 10 Studio games, they will earn their first rock status. They can return to the Studio at any time to improve their Studio Speed and status. They will be asked any question up to 12 x 12 during a one minute long, single player game, and will earn 1 coin per correct answer.
